

MEMORANDUM FOR: Director of Central Intelligence

Sir:

Walter Pforzheimer informed me of your desire to give consideration to having small models of our statue of Nathan Hale manufactured so that you could use them as presentation gifts on various occasions.

The cost factors involved are as follows and come from the Renaissance Foundry which cast our statue. To furnish eight inch replicas of the statue would cost a one-time investment of \$500 for the mold and \$75 for each statue up to 100; if 200 were ordered, the per statue charge would be \$65. Accordingly, if we were to order 100, it would cost approximately \$8,000. It would take approximately two months from date of order for a total of 100 to be delivered. We await your pleasure.

/s/ John F. Blake
